Art Unit: 1654

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, drawn to peptides and methods of using the peptides.

Group II, claim(s) 17-19, drawn to polynucleotides encoding the peptides, and vectors and cells comprising the polynucleotides.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Peptides and polynucleotides do not have a common property or activity, and do not share any significant structural elements.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Peptides identified as SEQ ID NOS:1-8, 10, 12, 14, 17, and 19-24 (see pages 3-4 of the specification).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 1654

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

The following claim(s) are generic: Claims 1-4, 11, and 12 (SEQ ID NOS:1, 3, 10, 12, 14, 17, and 22-24); Claims 5, 13, and 16 (SEQ ID NOS:1-8, 19-21, and 24); Claims 6-8 and 14, (SEQ ID NO:7); Claim 9 (SEQ ID NO:12); Claim 10 (SEQ ID NOS:2-4, 10, 12, 19, and 24); and Claim 15 (SEQ ID NOS:10 and 12). [It should be noted that although claim 15 is dependent upon claim 13, claim 15 does not recite peptide species which are species of claim 13. SEQ ID NOS:10 and 12 do not comprise an N-terminal glutamic acid residue as is required by claim 13.]

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The peptide species differ significantly in terms of amino acid sequence. Search of one sequence will not necessarily identify prior art relevant to the patentability of the other peptide species.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1654

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey E. Russel at telephone number (571) 272-0969. The examiner can normally be reached on Monday-Thursday from 8:00 A.M. to 5:30 P.M. The examiner can also be reached on alternate Fridays.
